SICO, THE ROBOT WITH A HEART

Conceived by our 35 year old Research & Development company International Robotics, Inc. as a part of its pioneering work in the science of Technology-to-People Behavioral Psychology, Sico is in real life a benevolent Robot who has been employed as a Surrogate, to help communicate with children and adults with special needs. As you will experience, the Robot is designed and operated according to a well research formula which empowers him to bond with – and entertain – any age, social, ethnic or cultural group present at your events.

Sico has also been very active as a Spokesperson for leading corporations, hosting Keynote Addresses, Press Conferences, Opening Ceremonies, Trade Shows, Promotional Tours, etc.

Sico's non-human attributes, coupled with his lovable, witty and compassionate personality, allows the robot to successfully circumvent the many constraints of social-protocol, communicating with his audiences while at the same time

removing stress, fears, anxieties, suspicions and defense mechanisms.
